

The primary purpose of the International Institute of Municipal Clerks (IIMC) is to provide education and professional development programs and opportunities for its members. IIMC recognizes that education and professional development are important to every member and that educational needs are diverse throughout the world. The educational philosophy of “No Clerk Left Behind” remains in the forefront as IIMC offers extensive educational programs and courses through a variety of methods, including our newest opportunity for members: **The IIMC Leadership Webinar Series**. Any one of the webinars can be taken by itself or in a series format of all fourteen. It has been noted that each is beneficial and collectively they are a game-changer for Clerks facing increased complexity, constrained resources, and the growing need to do more with less.
